
HA178M00 Series

3-terminal Fixed Voltage Regulators

HITACHI

Features

- Output current less than 500 mA
- Various output voltages: 5, 6, 7, 8, 9, 12, 15, 18, 20, and 24 V
- No external compensation circuit required
- Built-in current control circuit protects elements from destruction by short circuit
- Building chip junction temperature limiting circuit protects elements from thermal destruction
- Building internal power dissipation limiting circuit protects transistors in output stage

Ordering Information

Type	Application	Package
HA178M00PJ Series	Automotive use	TO - 220AB
HA178M00P Series	Industrial use	
HA178M00 Series	Commercial use	

Output Voltage Accuracy Grade

Type No.	Grade	Accuracy
HA178M05	None	± 4
HA178M12	A	± 2
	B	± 3
	C	+2, -4

Absolute Maximum Ratings (Ta = 25°C)

Item	Symbol	Rating	Unit	Notes
Input voltage	V _{IN}	35	V	1
Input voltage	V _{IN}	40	V	2
Power dissipation	P _T	7.5	W	3
Operating temperature	T _{opr}	-20 to +75	°C	
Junction temperature	T _j	-20 to +125	°C	
Storage temperature	T _{stg}	-55 to +125	°C	

- Notes: 1. For HA178M05P–HA178M18P, HA178M05–HA178M18
 2. For HA178M20P, HA178M24P, HA178M20, HA178M24
 3. Follow derating curve

HA178M00 Series

Characteristic Curves

HITACHI

HA178M00 Series

Package Dimensions

Unit: mm

Hitachi Code	TO-220AB
JEDEC	Conforms
EIAJ	Conforms
Mass (reference value)	1.8 g

HITACHI

Cautions

1. Hitachi neither warrants nor grants licenses of any rights of Hitachi's or any third party's patent, copyright, trademark, or other intellectual property rights for information contained in this document. Hitachi bears no responsibility for problems that may arise with third party's rights, including intellectual property rights, in connection with use of the information contained in this document.
2. Products and product specifications may be subject to change without notice. Confirm that you have received the latest product standards or specifications before final design, purchase or use.
3. Hitachi makes every attempt to ensure that its products are of high quality and reliability. However, contact Hitachi's sales office before using the product in an application that demands especially high quality and reliability or where its failure or malfunction may directly threaten human life or cause risk of bodily injury, such as aerospace, aeronautics, nuclear power, combustion control, transportation, traffic, safety equipment or medical equipment for life support.
4. Design your application so that the product is used within the ranges guaranteed by Hitachi particularly for maximum rating, operating supply voltage range, heat radiation characteristics, installation conditions and other characteristics. Hitachi bears no responsibility for failure or damage when used beyond the guaranteed ranges. Even within the guaranteed ranges, consider normally foreseeable failure rates or failure modes in semiconductor devices and employ systemic measures such as fail-safes, so that the equipment incorporating Hitachi product does not cause bodily injury, fire or other consequential damage due to operation of the Hitachi product.
5. This product is not designed to be radiation resistant.
6. No one is permitted to reproduce or duplicate, in any form, the whole or part of this document without written approval from Hitachi.
7. Contact Hitachi's sales office for any questions regarding this document or Hitachi semiconductor products.
