380MHz, Gain of +1/Gain of +2 **High-Speed Buffers**

General Description

The MAX4177/MAX4277 are wide-bandwidth, fast-settling buffer amplifiers featuring high slew rate, high precision, high output current, and low differential gain and phase errors. The MAX4177 is preset for unity voltage gain (OdB), and has a small-signal -3dB bandwidth of 380MHz. The MAX4277 is preset for a voltage gain of +2 (6dB), and has a small-signal -3dB bandwidth of 350MHz.

The MAX4177/MAX4277 feature the high slew rate and low power of current-mode feedback amplifiers. However, unlike conventional current-mode feedback amplifiers, these devices have a unique input stage that combines the benefits of current-feedback topology with those of the traditional voltage-feedback topology. This combination of architectures results in low input offset voltage and bias current, and high gain precision and power-supply rejection.

The MAX4177/MAX4277 are ideally suited for driving 50Ω or 75Ω loads. They are the perfect choice for highspeed cable-driving applications such as video routing. In addition, the devices incorporate a shutdown mode that can be used to disable the output in multiplexer applications and to conserve power. The MAX4177/ MAX4277 are available in 8-pin DIP, SO and μMAX packages.

Applications

Broadcast and High-Definition TV Systems

Video Switching and Routing

High-Speed Cable Drivers

Communications

Medical Imaging

Precision High-Speed DAC/ADC Buffers

High Speed:

380MHz -3dB Bandwidth (MAX4177)

350MHz -3dB Bandwidth (MAX4277)

200MHz Full-Power Bandwidth (MAX4177,

 $V_{OUT} = 2V_{p-p}$

150MHz Full-Power Bandwidth (MAX4277, $V_{OUT} = 2V_{p-p}$

150MHz 0.1dB Flatness Bandwidth (MAX4177) 120MHz 0.1dB Flatness Bandwidth (MAX4277)

- ♦ Low Differential Gain and Phase Error: 0.01%/0.01
- ♦ High Slew Rate: 1800V/µs (MAX4177)
- ♦ Low Power: 8mA Quiescent Supply Current 400µA in Shutdown Mode
- ♦ High-Impedance Output in Shutdown Mode
- ♦ Low Input Bias Current: 2µA
- **♦ Low Input Offset Voltage: 0.5mV**
- **♦ Low Input-Referred Voltage Noise:** 5nV√Hz
- ♦ High Gain Precision: 1.5% Max with 50Ω Load
- ♦ High PSRR: 75dB

Ordering Information

PART	TEMP. RANGE	PIN-PACKAGE
MAX4177CPA	0°C to +70°C	8 Plastic DIP
MAX4177CSA	0°C to +70°C	8 SO
MAX4177CUA	0°C to +70°C	8 µMAX
