## TC74LCX16374AFT

## Low-Voltage 16-Bit D-Type Flip-Flop with 5-V Tolerant Inputs and Outputs

The TC74LCX16374AFT is a high-performance CMOS 16-bit D-type flip-flop. Designed for use in $3.3-\mathrm{V}$ systems, it achieves high-speed operation while maintaining the CMOS low power dissipation.

The device is designed for low-voltage (3.3 V) VCC applications, but it could be used to interface to $5-\mathrm{V}$ supply environment for both inputs and outputs.

This 16 -bit D-type flip-flop is controlled by a clock input (CK) and an output enable input ( $\overline{\mathrm{OE}}$ ) which are common to each byte. It can be used as two 8-bit flip-flops or one 16-bit flip-flop. When the $\overline{\mathrm{OE}}$ input is high, the outputs are in a high-impedance state.

All inputs are equipped with protection circuits against static discharge.

Weight: 0.25 g (typ.)

## Features

- Low-voltage operation: $\mathrm{VCC}_{\mathrm{C}}=2.0$ to 3.6 V
- High-speed operation: $\mathrm{t}_{\mathrm{pd}}=7.0 \mathrm{~ns}(\max )(\mathrm{VCC}=3.0$ to 3.6 V$)$
- Ouput current: $|\mathrm{IOH}| / \mathrm{IOL}=24 \mathrm{~mA}(\mathrm{~min})(\mathrm{VCC}=3.0 \mathrm{~V})$
- Latch-up performance: $\pm 500 \mathrm{~mA}$
- Package: TSSOP (thin shrink small outline package)
- Power-down protection provided on all inputs and outputs

## RESTRICTIONS ON PRODUCT USE

- TOSHIBA is continually working to improve the quality and reliability of its products. Nevertheless, semiconductor devices in general can malfunction or fail due to their inherent electrical sensitivity and vulnerability to physical stress. It is the responsibility of the buyer, when utilizing TOSHIBA products, to comply with the standards of safety in making a safe design for the entire system, and to avoid situations in which a malfunction or failure of such TOSHIBA products could cause loss of human life, bodily injury or damage to property. In developing your designs, please ensure that TOSHIBA products are used within specified operating ranges as set forth in the most recent TOSHIBA products specifications. Also, please keep in mind the precautions and conditions set forth in the "Handling Guide for Semiconductor Devices," or "TOSHIBA Semiconductor Reliability Handbook" etc.
- The TOSHIBA products listed in this document are intended for usage in general electronics applications (computer, personal equipment, office equipment, measuring equipment, industrial robotics, domestic appliances, etc.). These TOSHIBA products are neither intended nor warranted for usage in equipment that requires extraordinarily high quality and/or reliability or a malfunction or failure of which may cause loss of human life or bodily injury ("Unintended Usage"). Unintended Usage include atomic energy control instruments, airplane or spaceship instruments, transportation instruments, traffic signal instruments, combustion control instruments, medical instruments, all types of safety devices, etc.. Unintended Usage of TOSHIBA products listed in this document shall be made at the customer's own risk.
